

U.S. Department of the Interior
Bureau of Land Management

Greater Sage-Grouse Planning

Secretarial Order No. 3353 directed the Bureau of Land Management to improve Greater Sage-Grouse conservation by strengthening collaboration and communication among states and the federal government.

How can sagebrush habitat be conserved while still allowing reasonable development of other resources, in support of local communities and economies?

The Bureau of Land Management - Utah has released a Draft Environmental Impact Statement and Resource Management Plan Amendment regarding management of Greater Sage-Grouse habitat on public lands in Utah.

This public meeting provides the public, tribes, and local and state governments with the opportunity to interact with Bureau of Land Management managers and specialists and learn about the Draft EIS and RMP
